

AI That Helps Employees Get Work Done

Leverage helps employees get answers, move work forward across the multiple applications they already use, and become more productive.

About Us

Leverage connects enterprise data across the tools employees already use. With AI-powered search and analysis, employees can ask questions across their company's information and instantly receive answers, summaries, and insights.

Core Capabilities

Find What You Need Instantly

Search across docs, emails, chats, CRMs, and internal work apps from one place.

Move Work Forward

Automate repetitive steps and workflows so teams can focus on higher-value work.

Understand What Matters Through Insights

Leverage summarizes information and surfaces context so employees can quickly understand issues, opportunities, and decisions.

Book a Demo

See how Leverage works with your company's data. Discover how employees can ask questions across their work apps and get instant answers:
